IoT standard ecosystem – Gap or Coexistence?

SDOs

- ISO
- ITU
- IETF
- W3C
- IEEE
- Bluetooth SIG
- ETSI
- OneM2Ms
- OASIS

Alliances / Foundations

- CarConnectivityConsortium
- Connectivity Standard Alliance
- Global Platform
- GIIC
- ICCE
- Industrial Internet Consortium
- LoRa
- Open Connectivity Foundation
- Sparklink

Car & Home - Consumer IoT landscape

CARCONNECTIVITY consortium

Board of Directors

Steering Committee

Ecosystem Working Group | Use Case & Requirements Working Group | Technical Working Group | Certification Working Group

China Market Task Group

Digital Key Task Group | Security Certification Task Group

Spectrum Regulatory Task Group | Functional Certification Task Group

Phone OEM1 (User A) → Transfer Key → Phone OEM2 (User B)

Access Vehicle → Vehicle OEM1, Vehicle OEM2, Vehicle OEM3

Automated Charging

300

csa connectivity standards alliance

500+ members

amazon, apple, ASSA ABLOY, COMCAST, Google, HUAWEI, IKEA, Kroger, LEEDARSON, legrand, LUTRON, NXP, resideo, Schneider Electric, signify, SILICON LABS, SmartThings, somfy, ST

Matter Working Group 200+ Member Organizations 2100+ Individual Members	Zigbee Working Group 165+ Member Organizations 1260+ Individual Members
Data Model Working Group 140+ Member Organizations 1040+ Individual Members	Access Control Working Group 65+ Member Organizations 400+ Individual Members
China Member Group 30+ Member Organizations 70+ Individual Members	EU Interest Group 56 Member Organizations 115+ Individual Members
Industry Stakeholder Groups 4 Groups - retail, silicon, ecosystems & manufacturers
